

WORKFLOW

- Signing in and providing user's personal details.
- Generating an automated email to confirm user's registration.
- Logging in to the application.
- User interacts with the web application to load an image.
- The image is passed to the server application, which uses Clarifai's AI-Driven Food Detection Model Service.
- Analyzing the images and Nutrition API to provide nutritional information about the analyzed Image.
- Nutritional information of the analyzed image is returned to the application for display.
